VOLUME 13

JOURNAL

OF THE

AMERICAN SOCIETY

OF

SUGAR BEET TECHNOLOGISTS

EXECUTIVE COMMITTEE

President ..... B. E. Easton
Canada & Dominion Sugar Company Limited
Chatham, Ontario, Canada

Vice President ..... Lloyd T. Jensen
The Great Western Sugar Company
Denver, Colorado

Secretary-Treasurer ..... James H. Fischer
Beet Sugar Development Foundation, Fort Collins, Colorado

Immediate Past President ..... Guy Rorabaugh
Holly Sugar Corporation, Colorado Springs, Colorado

BOARD OF DIRECTORS

Pacific Coast Region:	E. M. Daniels
Intermountain Region:	Ronald C. Johnson
Eastern Rocky Mountain Region:	J. L. Porterfield
North Central and Great Lakes Region:	Max C. Henderson
Canada:	J. W. Hall
Processing at Large:	R. A. McGinnis
Agricultural at Large:	J. C. Tanner

Manuscripts submitted for publication and communications pertaining to editorial matters should be sent to James H. Fischer, Secretary-Treasurer, American Society of Sugar Beet Technologists, P. O. Box 538, Fort Collins, Colorado.

Each manuscript received for publication will be appraised for its technical and historical value by a Publications Committee. The Publications Committee shall have final authority regarding publication of manuscripts. The Journal of the American Society of Sugar Beet Technologists shall contain papers presented at General and Regional meetings and articles of immediate interest prepared specifically for this periodical.

Material submitted to the Publications Committee for publication becomes the property of the American Society of Sugar Beet Technologists. The Publications Committee will have jurisdiction over the release of papers and abstracts for use other than in the Journal.

AUTHOR INDEX

AbraRL
Abrams, R. L.
Preplant weed control on sugar beets----------13(5) 389

AfanMM
Afanasiev, M. M.
The effect of simulated hail injuries on yield and sugar content of beets----------13(3) 225

AlexMA
Alexander, M. A.
Sugar beet tops and modern sugar beet production------13(5) 432

AndeFN
Anderson, F. N.
Effectiveness of PEBC, DATC, and Endothall for controlling weeds in sugar beets in Western Nebraska----------13(1) 81

ArmeAA
Armer, Austin A.
Historical highlights in sugar beet harvest mechanization----------13(4) 318

BaldCS
Baldwin, C. S.
Production practices affecting yield and sugar content of sugar beets grown in Ontario, Canada--1961 and 1962----------13(6) 509

BaveLD
Baver, L. D.
Nitrogen effects on sugar crops----------13(1) 21

BedfCL
Bedford, C. L.
Sucrose determination in sugar beets using paper chromatography and spectrophotometry----------13(2) 185

BennCW
Bennett, C. W.
Isolates of beet mosaic virus with different degrees of virulence----------13(1) 27
Marble leaf of sugar beet, caused by a juice transmissible virus----------13(1) 33

BennEG
Bennison, E. G.
Thin film ultra-violet sterilization of liquid sugar, using the Aquafine sterilizer----------13(3) 214

BichSE
Bichsel, S. E.
The chemical destruction of sucrose, fructose, and glucose in hot alkaline process juices and liquors----------13(5) 406

BroaCE
Broadwell, C. E.
Production practices affecting yield and sugar content of sugar beets grown in Ontario, Canada--1961 and 1962----------13(6) 509

BushHL
Bush, H. L.
Variation in emergence of sugar beet plants attributable to different drill units of the same planter----------13(2) 151
Probability analysis of herbicide response----------13(8) 721

CarruA
Carruthers, Albert
The fate of formaldehyde in sugar beet juices---------13(2) 105

ChanAS
Chang, Allison S.
Evaporator heat transfer coefficients for beet sugar solution----------13(2) 153
Mathematical approach to determine vaccum pan boiling time for full seeding method using milled fondant----------13(3) 201

ClanDC
Clanton, D. C.
Sugar beet tops and modern sugar beet production------13(5) 432

ConsSM
Constantinides, Spiros M.
Sucrose determination in sugar beets using paper chromatography and spectrophotometry----------13(2) 185

CookRL
Cook, R. L.
Sugar beet production in Michigan as affected by crop sequence and fertility levels----------13(4) 304

DaviJF
Davis, J. F.
Sugar beet production in Michigan as affected by crop sequence and fertility levels----------13(4) 304
Production practices affecting yield and sugar content of sugar beets grown in Ontario, Canada--1961 and 1962----------13(6) 509

DextST
Dexter, S. T.
Evaluation of sugar beet storage practices by using the percentage purity of the "thin juice"-----13(7) 607

DorsHE
Dorst, Howard E.
Insect control on sugar beets by seed or soil treatments----------13(7) 649

DowdRH
Dowdy, R. H.
Sugar beet production in Michigan as affected by crop sequence and fertility levels----------13(4) 304

DoxtCW
Doxtator, C. W.
The performance of sugar beet selections made for purity and chloride at three levels of nitrogen fertility----------13(4) 362
Combining ability in autotriploid sugar beets, *Beta vulgaris* L.----------13(6) 538
Paired-plant crosses in sugar beets----------13(6) 548

DubetS
Dubetz, S.
Soil temperature and nitrogen effect on yield and phosphorus uptake by sugar beets----------13(3) 238

EckrEG
Eckroth, E. G.
The effect of incorporation methods on weed control with Tillam in the Rocky Mountain region----------13(3) 195

EsteLW
Estes, Larry W.
Host-parasite relation of *Nacobbus batatiformis* and the sugar beet and other hosts----------13(6) 523

EvanLE
Evans, L. E.
A method for positive selection of 4N sugar beet plants in the vegetative C_0 generation----------13(8) 687

FairJL
Fairley, J. L.
Relation of water soluble substances in fruits of sugar beet to speed of germination of sugar beet seeds----------13(5) 379

FinkRE
Finkner, R. E.
The performance of sugar beet selections made for purity and chloride at three levels of nitrogen fertility----------13(4) 362
Combining ability in autotriploid sugar beets, *Beta vulgaris* L.----------13(6) 538
Paired-plant crosses in sugar beets----------13(6) 548

ForcSL
Force, S. L.
The Findlay flume and condenser water system----------13(6) 478

FrakMG
Frakes, M. G.
Evaluation of sugar beet storage practices by using the percentage purity of the "thin juice"-----13(7) 607

FulleD
Fullerton, Dale
Beet leafhopper and curly-top disease survey in Washakie County----------13(1) 62

GaddRS
Gaddie, Robert S.
Thin film ultra-violet sterilization of liquid sugar, using the Aquafine sterilizer----------13(3) 214
Odor in refined sugar----------13(8) 716

GoodAE
Goodban, A. E.
Uses for sugar beet pulp----------13(5) 467
Liming of sugar beet cossettes----------13(7) 566

GoodJC
Goodwin, J. C.
Thin-layer chromatography of sugar beet carbohydrates----------13(6) 503

HaddJL
Haddock, Jay L.
Critical levels versus quantity-quality factors for assessing nutritional status of sugar beet plants----------13(1) 42
Nutrient balance and concentration in sugar beet production----------13(7) 613

HallCW
Hall, C. W.
Impact effects on germination and seedling vigor of sugar beets----------13(4) 341
Flotation and conveying air velocities for processed monogerm sugar beet fruits----------13(5) 448

HallDH
Hall, D. H.
Losses caused by beet mosaic virus in California grown sugar beets----------13(3) 244
Occurrence of the alfalfa mosaic virus in sugar beet in California----------13(4) 374

HanzPC
Hanzas, P. C.
The performance of sugar beet selections made for purity and chloride at three levels of nitrogen fertility----------13(4) 362

HarriL
Harris, Lionel
Sugar beet tops and modern sugar beet production------13(5) 432

HarrWA
Harris, W. A.
Beet pulp in all-barley rations----------13(2) 192
Operation of juice softeners in a beet sugar factory----------13(4) 296

HeckRJ
Hecker, Richard J.
Pollen viability determination with tetrazolium bromide----------13(8) 748

HelmRH
Helmerick, R. H.
The performance of sugar beet selections made for purity and chloride at three levels of nitrogen fertility----------13(4) 362
Combining ability in autotriploid sugar beets, *Beta vulgaris* L.----------13(6) 538
Paired-plant crosses in sugar beets----------13(6) 548

HeynGV
Heyndrickx, G. V.
Colorimetric micro determination of calcium in sugar-house products----------13(8) 681

HillFJ
Hills, F. J.
Losses caused by beet mosaic virus in California grown sugar beets----------13(3) 244

HogaGJ
Hogaboam, G. J.
Influence of size of fruit and seed on germination of a monogerm sugar beet variety----------13(2) 116

HolsEM
Holst, E. M.
The effect of incorporation methods on weed control with Tillam in the Rocky Mountain region----------13(3) 195

JantzF
Jantzef, Fern
Paper chromatographic determination of raffinose in sugar beet molasses----------13(3) 218

JohnJR
Johnson, J. R.
Recent advances in molasses exhaustion----------13(8) 662

KaupCR
Kaupke, C. R.
Injection of preemergence herbicides----------13(5) 462

KellHW
Keller, H. W.
Operation of juice softeners in a beet sugar factory----------13(4) 296

KunzOR
Kunze, O. R.
Impact effects on germination and seedling vigor of sugar beets----------13(4) 341
Flotation and conveying air velocities for processed monogerm sugar beet fruits----------13(5) 448

LaugJE
Laughlin, James E.
Waste water treatment studies at Tracy, California----13(5) 415

McCrRM
McCready, R. M.
Uses for sugar beet pulp----------13(5) 467
Liming of sugar beet cossettes----------13(7) 566

McFaJS
McFarlane, J. S.
Sugar beet breeding lines combining resistance to bolting and disease----------13(6) 555

McGaFX
McGarvey, Frank X.
An evaluation of a multiple bed dionization process for beet sugar recovery----------13(3) 252

MaagGW
Maag, Grace W.
Levels of total nitrogen, potassium and sodium in petioles and in thin juice of sugar beets--------13(2) 127

MacLCF
MacLeod, C. F.
Not a new, but another look at sugar----------13(1) 5

ManuGD
Manuel, G. D.
The challenges of an expanding beet sugar industry----------13(1) 9

MillLO
Mills, L. O.
Waste water treatment studies at Tracy, California----13(5) 415

NormLW
Norman, L. W.
Operation of juice softeners in a beet sugar factory----------13(4) 296
Waste water treatment studies at Tracy, California----13(5) 415

OldJFT
Oldfield, J. F. T.
The fate of formaldehyde in sugar beet juices---------13(2) 105

OlsoRF
Olson, R. F.
A rapid method for the routine factory analysis of lactic acid----------13(1) 59

OrleLP
Orleans, L. P.
Operation of juice softeners in a beet sugar factory----------13(4) 296

PaynMG
Payne, Merle G.
Levels of total nitrogen, potassium and sodium in petioles and in thin juice of sugar beets--------13(2) 127
Associations of levels of total nitrogen, potassium, and sodium in petioles and in thin juice with weight of roots per plot, percentage sucrose and percentage apparent purity in sugar beets----------13(2) 138

PeayWE
Peay, Walter E.
Laboratory screening tests of insecticides for control of the beet webworm----------13(7) 645

PeteDF
Peterson, D. F.
The effect of incorporation methods on weed control with Tillam in the Rocky Mountain region----------13(3) 195

PetoFH
Peto, F. H.
Methods of loosening tight seed caps in monogerm seed to improve germination----------13(3) 281

PipeCD
Piper, C. D.
Sugar beet production in Michigan as affected by crop sequence and fertility levels----------13(4) 304

PottAL
Potter, A. L.
Paper chromatographic determination of raffinose in sugar beet molasses----------13(3) 218

PoweLR
Powers, LeRoy
Levels of total nitrogen, potassium and sodium in petioles and in thin juice of sugar beets--------13(2) 127
Associations of levels of total nitrogen, potassium, and sodium in petioles and in thin juice with weight of roots per plot, percentage sucrose and percentage apparent purity in sugar beets----------13(2) 138

PriceC
Price, Charles
The effects of five legume crops on soil populations of the sugar beet nematode (*Heterodera schachtii* Schmidt)----------13(4) 314
Resistance to the sugar beet nematode (*Heterodera schachtii*) in F tetraploid hybrids between *Beta vulgaris* and *Beta patellaris*----------13(4) 370
Breeding sugar beets for resistance to the cyst nematode *Heterodera schachtii*----------13(5) 397
Heterodera schachtii in relation to damage from root rot of sugar beets----------13(7) 604

PurcDE
Purcifull, D. E.
Occurrence of the alfalfa mosaic virus in sugar beet in California----------13(4) 374

RankGH
Rank, G. H.
A method for positive selection of 4N sugar beet plants in the vegetative C_0 generation----------13(8) 687

RiccBA
Ricci, B. A.
Thin-layer chromatography of sugar beet carbohydrates----------13(6) 503

RicJEA
Rich, J. E. A.
Instrumentation within the British Sugar Corporation----------13(4) 287

RobeDW
Robertson, D. W.
Longevity of sugar beet seed----------13(2) 177

RobeLS
Robertson, L. S.
Sugar beet production in Michigan as affected by crop sequence and fertility levels----------13(4) 304

RorabG
Rorabaugh, Guy
Presidential address----------13(1) 1

RussGC
Russell, G. C.
Soil temperature and nitrogen effect on yield and phosphorus uptake by sugar beets----------13(3) 238

RyseGK
Ryser, George K.
A regression study on tare samples of sugar beets in relation to factors influencing productivity and quality----------13(8) 727

SandsR
Sandstedt, Robert
Host-parasite relation of *Nacobbus batatiformis* and the sugar beet and other hosts----------13(6) 523

SavitH
Savitsky, Helen
Resistance to the sugar beet nematode (*Heterodera schachtii*) in F tetraploid hybrids between *Beta vulgaris* and *Beta patellaris*----------13(4) 370
Weight of fruits in self-fertile, male-sterile, and self-sterile diploid and tetraploid monogerm *Beta vulgaris* L.----------13(7) 621
Effectiveness of selection for tetraploid plants in C_0 generation on the basis of the number of chloroplasts in stomata----------13(8) 655

SaviVF
Savitsky, V. F.
Weight of fruits in self-fertile, male-sterile, and self-sterile diploid and tetraploid monogerm *Beta vulgaris* L.----------13(7) 621

SchnCL
Schneider, C. L.
Additional hosts of the beet water mold *Aphanomyces cochlioides* Drechs----------13(6) 469
Control of Cercospora leaf spot of sugar beet with ultra-low-volume oil-based fungicidal mists----------13(7) 563
Heterodera schachtii in relation to damage from root rot of sugar beets----------13(7) 604

SchoeK
Schoenrock, Karl
A new approach to the saccharate cake purity determination----------13(5) 425
Recent advances in molasses exhaustion----------13(8) 662

SchuML
Schuster, M. L.
Host-parasite relation of *Nacobbus batatiformis* and the sugar beet and other hosts----------13(6) 523

SebeJM
Sebeson, John M.
Relation of water.soluble substances in fruits of sugar beet to speed of germination of sugar beet seeds----------13(5) 379

ShepRJ
Shepherd, R. J.
Losses caused by beet mosaic virus in California grown sugar beets----------13(3) 244
Occurrence of the alfalfa mosaic virus in sugar beet in California----------13(4) 374

SkoyIO
Skoyen, I. O.
Sugar beet breeding lines combining resistance to bolting and disease----------13(6) 555

SnydFW
Snyder, F. W.
Influence of size of fruit and seed on germination of a monogerm sugar beet variety----------13(2) 116
Impact effects on germination and seedling vigor of sugar beets----------13(4) 341
Relation of water soluble substances in fruits of sugar beet to speed of germination of sugar beet seeds----------13(5) 379
Flotation and conveying air velocities for processed monogerm sugar beet fruits----------13(5) 448

SpikJD
Spikes, John D.
Some effects of ionizing radiation on the metabolism and growth of sugar beets----------13(4) 333

StarJB
Stark, J. B.
Ion exclusion purification of molasses----------13(6) 492

SteeAE
Steele, Arnold E.
Influence of prolonged association of sugar-beet nematode and tomato on intensity of parasitism------13(2) 170
The effects of five legume crops on soil populations of the sugar beet nematode (*Heterodera schachtii* Schmidt)----------13(4) 314
The host range of the sugar beet nematode, *Heterodera schachtii* Schmidt----------13(7) 573

StoutM
Stout, Myron
Redistribution of nitrate in soils and its effects on sugar beet nutrition----------13(1) 68
Some effects of ionizing radiation on the metabolism and growth of sugar beets----------13(4) 333

StuaDM
Stuart, Darrel M.
Critical levels versus quantity-quality factors for assessing nutritional status of sugar beet plants----------13(1) 42
Nutrient balance and concentration in sugar beet production----------13(7) 613

SullEF
Sullivan, E. F.
Preplant weed control on sugar beets----------13(5) 389
Probability analysis of herbicide response----------13(8) 721

ThorE
Thor, Eric
Agriculture's responsibility in a growing economy----------13(1) 13

ThorML
Thornton, Mildred L.
Longevity of sugar beet seed----------13(2) 177

ViglDR
Viglierchio, D. R.
On the nature of hatching of *Heterodera schachtii*.
II. Natural sources of hatching stimulants----------13(4) 354
On the nature of hatching of *Heterodera schachtii*.
III. Principles of hatching activity----------13(8) 698

WalkHG
Walker, H. G. Jr.
Thin-layer chromatography of sugar beet
carbohydrates----------13(6) 503

WaltSG
Walter, S. G.
Preplant weed control on sugar beets----------13(5) 389

WestRR
West, Robert R.
Thin film ultra-violet sterilization of liquid
sugar, using the Aquafine sterilizer----------13(3) 214
Odor in refined sugar----------13(8) 716

WickGA
Wicks, G. A.
Effectiveness of PEBC, DATC, and Endothall for
controlling weeds in sugar beets in Western
Nebraska----------13(1) 81

WoodRR
Wood, R. R.
Preplant weed control on sugar beets----------13(5) 389

YuPK
Yu, P. K.
On the nature of hatching of *Heterodera schachtii*.
II. Natural sources of hatching stimulants----------13(4) 354
On the nature of hatching of *Heterodera schachtii*.
III. Principles of hatching activity----------13(8) 698
